

Networks without Operators

**Optical Society of
America**

Anaheim, CA.
March 27, 2007

1. Learning Learning

2. Teaching is only one way

3. Leverage children themselves

What is: One Laptop Per Child ?

1. A non-profit entity with \$25M funding for non-recurring engineering costs
2. About **scale, scale, scale** being **global** is crucial
launch 3-5 million in 2007
50-150 million 2008
>5 large diverse countries
3. To provide to children: to own, to take home, to use seamlessly

Launch countries

Argentina
Brazil
Libya
Nigeria
Pakistan
Palestine
Rwanda
Thailand
Uruguay

In discussion with: Mexico, Romania, Ethiopia, Angola, Turkey and the Central American States

Laptop price commitment

\$100 target price end of 2008

Price will float based on:
currency, memory, nickel, cobalt

\$148 anticipated in 2007
constantly lowering

\$ 50 target price in 2010

Gray market issues

Economics

Initial and launch:

Central government funded

Single big orders

not USA or developed countries

Subsequently:

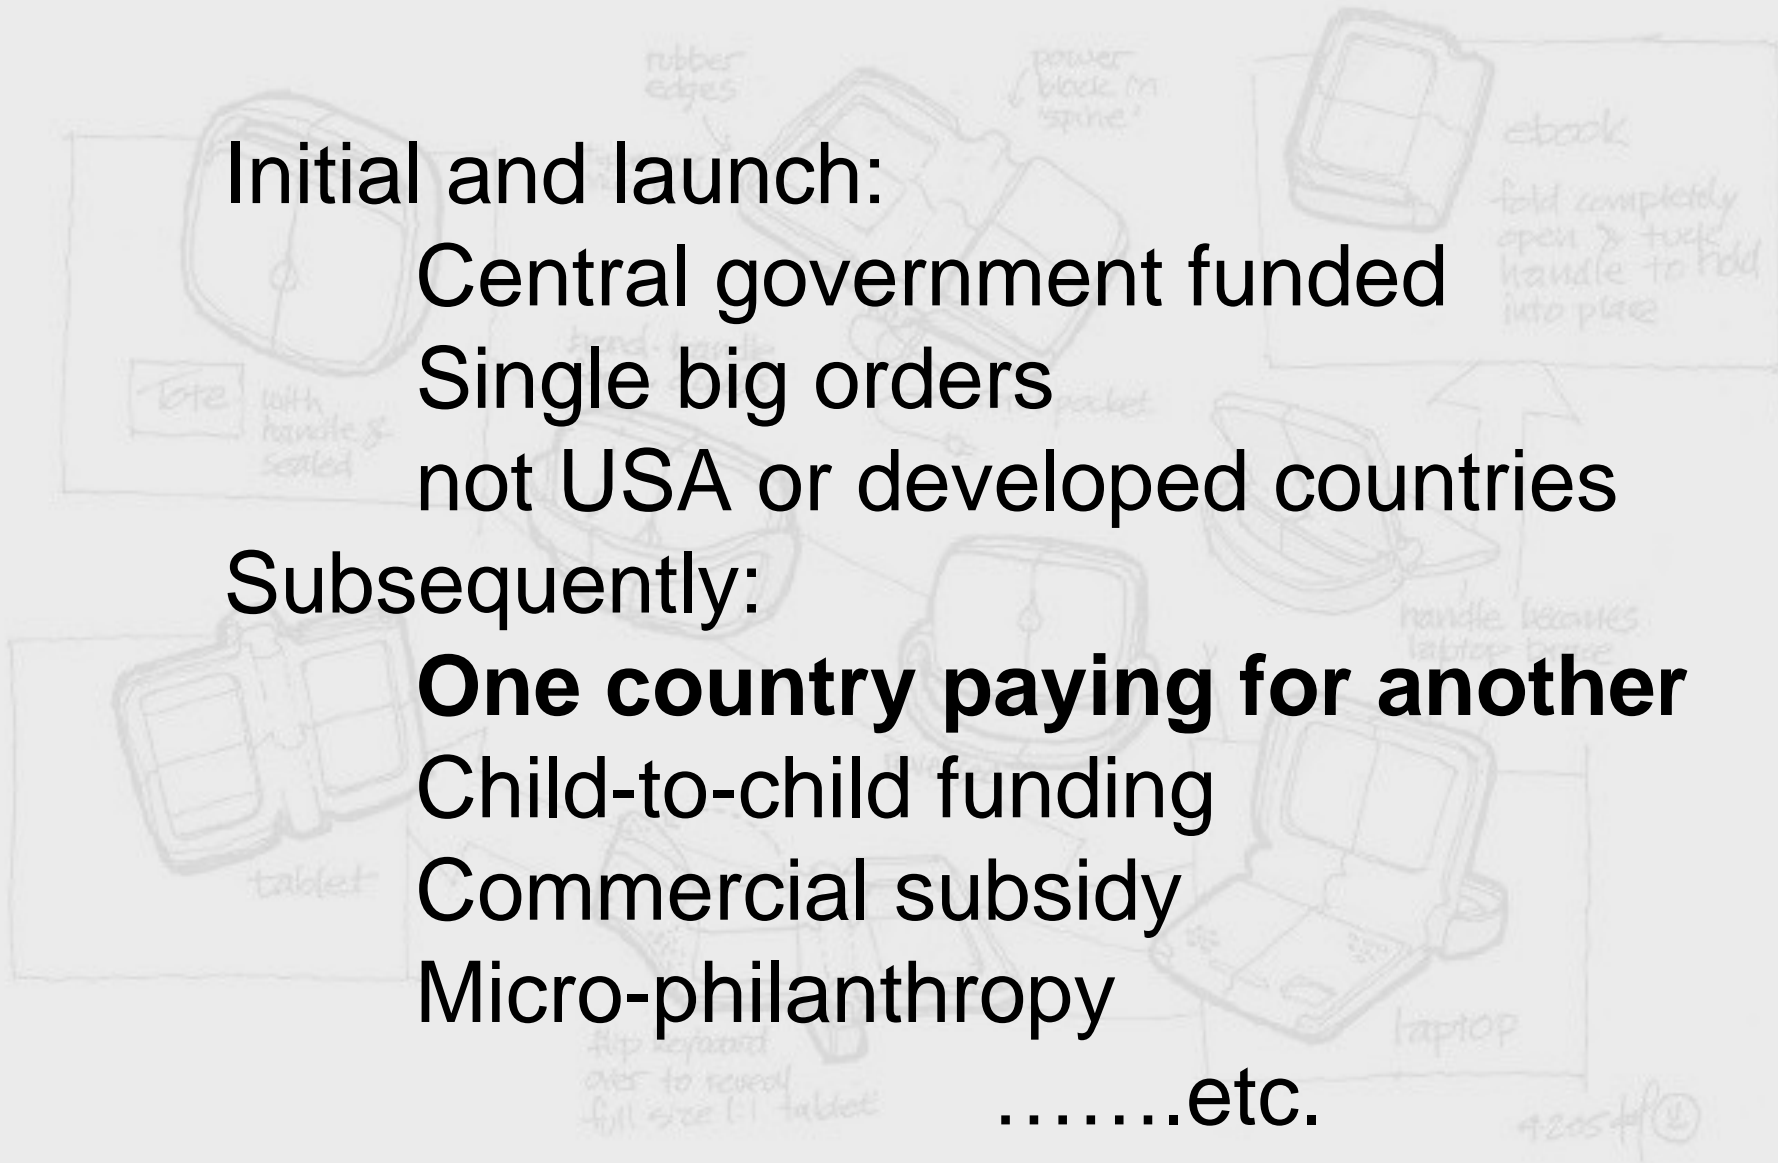

One country paying for another

Child-to-child funding

Commercial subsidy

Micro-philanthropy

.....etc.

Some side effects:

Linux on the desktop

No caps lock key

**Power consciousness,
more human power**

**No bloated software,
stop featuritis**

Viral telecommunications

Peer to peer everything
