

Solution for Improving the Military Security System “Optical Cable Fence Maintenance”

The closure solution can be applied to the **scientific border projects**, one of the main topics on the table to **improve the military security system**. The military started applying fiber drop cable to the border fence, which makes possible to track the exact location of any kind of damage caused by suspicious matter to enhance the monitoring and surveillance system. In this case the military needed to face the frequent maintenance to manage the fiber drop cable fence but **using the SOLMATE closure, any failure or breakage outdoor fence can be simply and quickly repaired and the problem can be easily resolved**.

Indoor Closure
