

The image shows a stack of three white boxes with blue accents. The top box is open, revealing a blue circular component inside. The word 'ENSURE' is printed in large blue letters on the top box. Below it, in smaller text, is 'ENSURE Optic Electronics Technology'. The Vodafone logo is visible on the side of the boxes. The Vodafone logo is also present in the top right corner of the page, in red text.

## Vodafone and Ensure Celebrate 6 Years of Partnership

Ensure's Premium Connectivity Solutions Help the Telecom Operator Meet the Needs of Today and Tomorrow

LISBON/SHANGHAI, June 2021 -- June 21st marks the sixth anniversary of partnership between Vodafone Portugal and optical network solutions provider Ensure. Since 2015, Vodafone has been able to meet the ever-growing demands on its fiber optic network thanks to Ensure's best-in-class components, including PLC splitters.

Vodafone routinely conducts rigorous performance and manufacturing reviews of supplier components to guarantee strict compliance with internal quality requirements and adherence to international standards and guidelines. Ensure's components have offered Vodafone nearly 100% reliability, giving the global telecom operator the confidence and reliability they need as they build the networks to meet the needs of today and tomorrow.

A market leader in innovation and customer service, global telecommunications company Vodafone provides nationwide coverage with its state-of-the-art fiber network, connecting 3.4 million households and more than 4.7 million mobile customers.

Supplying customers on the Iberian Peninsula since 2008, Ensure crafts premium components (PLC splitters, ceramic ferrules, passive optical components, and WDM products) to meet the exploding growth of fiber optic networks. Founded in 2002 and part of the HH Group, Ensure maintains its industry leadership thanks to a massive R&D commitment and on-site, precision manufacturing of all essential components. Ensure controls the entire production process from start to finish on a scalable and customizable production chain, and can also provide white-label design and packaging for customers.
