

Welcome to ACCELINK on OFC2021

Accelink takes part in OFC2021 online exhibition. As a head company in optical communication industry, we launches the full series of component and module solution in four fields of transmission, data center, wireless access and FTTX. Due to the epidemic, this OFC exhibition is held online. The new platform makes the showcase richer and communication more convenient. Welcome our virtual booth.

The key product recommendation involves Super C +Super L Series, 400G ZR QSFP-DD, 400G CFP2 DCO, 25G/50G DWDM LR/ER, 800G 2*FR4/DR8 QSFP-DD/OSFP, 10G PON Series. We also display a full portfolio of optical modules for transmission, access and data center, which provides a strong guarantee for the continuous growth of network bandwidth and the maintenance and smooth transition from old systems to new systems.

Accelink pursues the concept of "world-class, century- enterprise " all along. We continue investment and innovation in the field of optoelectronic technology and constantly strengthen the cooperation with worldwide customers in the fields of backbone network, access network, data center and others to provide high performance stable and reliable products and solutions for Internet information providers, optical network system equipment providers, industrial private networks etc.

About Accelink :

Accelink mainly engages and is famous in the field of optoelectronic devices research design development and manufacturing. At present, Accelink owns eight subsidiaries around the world. For more detailed information, please visit website www.accelink.com
