

For Immediate Release
High-Power Fiber-Optic Components

DRAFT RELEASE – Version 1.0

Santa Clara, California, USA – May 25th, 2021 – AC Photonics, Inc., a world leading supplier of fiber optic products for a variety of diversified applications, announces availability of new high-power fiber-optic components, including:

- Single-mode optical fiber isolator operating at an optical power up to 10W
- Single-mode fiber-optic splitter / coupler up to 5W
- Pump power combiner up to 10W per port
- Thin film filter components / WDM devices up to 2W

These new products are designed and built to meet the needs of a growing number of applications requiring high optical power operation. Contact AC Photonics for further information regarding our products and their applications.

About AC Photonics, Inc.

Founded in 1995, AC Photonics designs, manufactures and markets fiber optic components, devices and systems for a variety of diversified applications. With our highly experienced engineering and production team based in Santa Clara, CA, USA, AC Photonics provides full engineering and manufacturing support to our customers' projects. From concept to design phase to large-volume manufacturing, we work in close interaction with our customers' teams to make sure our products meet and exceed their expectations. AC Photonics is ISO 9001:2015 certified. For more information about AC Photonics and its products, please visit www.acphotonics.com.
