## For Immediate Release Compact Fiber-Optic Components

## **DRAFT RELEASE - Version 1.0**

**Santa Clara, California, USA – May 25<sup>th</sup>, 2021 –** AC Photonics, Inc., a world leading supplier of fiber optic products for a variety of diversified applications, announces availability of new compact fiber-optic components, including:

- Two fiber-optic isolators in a single 3mm x 25mm package (2-in-1)
- Thin film components / WDM in a 3.2mm x 28mm package
- Compact course wavelength division multiplexing (CCWDM) in a 28mm x
   53mm package for an 8+1 channel CWDM device

These new products are designed and built to meet the needs of a growing number of applications requiring high-quality fiber-optic components in a compact package. Contact AC Photonics for further information regarding our products and their applications.

## **About AC Photonics, Inc.**

Founded in 1995, AC Photonics designs, manufactures and markets fiber optic components, devices and systems for a variety of diversified applications. With our highly experienced engineering and production team based in Santa Clara, CA, USA, AC Photonics provides full engineering and manufacturing support to our customers' projects. From concept to design phase to large-volume manufacturing, we work in close interaction with our customers' teams to make sure our products meet and exceed their expectations. AC Photonics is ISO 9001:2015 certified. For more information about AC Photonics and its products, please visit www.acphotonics.com.
