

Digitization is unstoppable. Home offices, mobile apps and online shopping are part of our everyday lives. We have the leading technologies for the global data flood of today and tomorrow. High-tech from the canton of Obwalden, Switzerland.

For the technical support of our sales team we are looking for a

Application Engineer MEMS / Micro Optics (m/f).

Your main tasks:

- Technical responsibility for customer projects
- Advising sales, partners and customers on technical inquiries and feasibility analyses, complex acquisition projects as well as at trade fairs and during customer visits
- Evaluate customer inquiries and provide technical advice to customers
- Derive customer requirements into technical specifications
- Supporting the Business Line Manager by helping to shape and implement the roadmap (definition and launching feasibility studies and projects)
- Follow-up and resolution of customer complaints
- Creation of training documents for the sales department
- Support of the Optical Engineer in refractive and diffractive optics
- Worldwide travel 10 - 20% of the time

Your profile:

- Technical university degree (physics, electrical engineering, optics) or equivalent
- Several years of practical experience in MEMS / microtechnology or semiconductor technology
- Experience in design and calculation of optical components desirable

- Experience in contact with customers and suppliers
- Pragmatic, strong implementation and cooperative personality
- Good command of German and English

If you are also enthusiastic about innovative technologies, become our new team member!

Iris Gisler is looking forward to receiving your complete application documents to:
