

FTTx Solution

ADTEK designs and manufactures fiber optic connectivity and cabling products utilized in extensive optical network applications throughout public and private sectors, like datacom, telecom and FTTX networking. We not only offer a complete line of superior quality products, but also work with our customers to develop new formulas and address the burgeoning market.

Data Center Cabling Solution

Data centres are at the heart of any business IT capability. Independent of their respective sizes, high availability and peak performance are required all-day, every-day. As networks are designed, deployed, scaled up, and replaced, infrastructure managers are struggling to keep pace because of complex architectures and operations processes.
