

ABOUT HYC

HYC is a professional OEM/ODM manufacturer of passive optical device with over 21 years of experience. Its main products are optical fiber connectivity solutions, WDM, PLC splitters, optical switch and other passive devices which are widely used in 4G/5G, Telecom, Data Center, Cloud Computing industry and other fields.

21 years
Industry experience

OEM/ODM
Service

1000+
Employees

40,000m²
Factory areas

01

Fiber array design
and manufacture
technology

**3 CORE
TECHNOLOGIES**

02

Precise mould/injection
molding design and
manufacture technology

03

Optical passive components
from post-chip processing to
coupled packaging technology

ABOUT HYC

Production Lines

Connector/adapter workshop

Capacity

1. Parts, 5 million per month
2. Adapter, 4 million per month
3. Attenuator: 20000 pcs per month

Patch cord workshop

Capacity

1. USCONEC Trained MTP Assembly manufactory
2. R&M Approved E2000 terminated manufactory
3. Capacity, 4 million termination per month

PLC workshop

Capacity

120K pcs per month(1x8CH)

WDM workshop

Capacity

200K CH per month

MEMS workshop

Capacity

10K CH per month

Passive Optical Devices OEM/ODM Manufacturer

HYC New Milestone

HYC's new industry park is completing recently covering a total area of 24,286m² and total construction area of nearly 40,000m². This means HYC is transforming from "manufacturing" to "intelligent manufacturing" with a great enhancement in production capability.

The annual output will be increase

300%

Fiber connectors will reach **60 million** pieces

WDM will reach **4 million** pieces

PLC splitters will reach **2 million** pieces

The new industrial park consists of an automated production center, a digital R&D center, an information office area, an intelligent exhibition hall, and a user-friendly living center, with complete supporting facilities, which is highly efficient, intelligent and comfortable.

- Production Center 15000m²
- Production Center 8000m²
- Office Area 3000m²
- R&D center 6000m²
- Living Center 4000m²
